EDUCATION

Universitas Bina Nusantara

2023 - Present

- Bachelor of Computer Science – Software Engineering
- GPA 3.77/4.00, 1st to 6th Semester

WORK EXPERIENCE

PT Bank Sinarmas Tbk

February 2026 - Present

Software Engineer Intern, Credit Risk Engine

- Developed and deployed backend features for an existing credit risk scoring engine, adding **6 new nodes** to the scoring flow using Java, Spring Boot, and MyBatis, within an Agile sprint workflow.
- Independently built a new API endpoint end to end, covering **DTO, Entity, Mapper, Controller, and Service** layers, and integrated an existing business-day/holiday-check API into the scoring workflow
- Diagnosed and escalated a **critical scoring bug** where the risk-evaluation module returned invalid output instead of a valid risk tier, coordinating with the Product Manager to resolve it before QA sign-off.
- Supported SIT and UAT cycles by assisting QA and business stakeholders with test case validation and troubleshooting, verifying API behavior via Postman and confirming database integrity before QA handoff, for a scoring engine consumed by **multiple systems** across the bank

Movehaus - Studio Management & Booking Platform (movehaus.id)

May 2026 - June 2026

Freelance Full-Stack Developer

- Partnered directly with the client to gather requirements, then **independently designed, built, and shipped** a full-stack booking and membership platform on React and Supabase (PostgreSQL, Auth, Storage), including role-based access control for members, staff, and admins, from schema design through production deployment.
- Proactively conducted a full security audit of the self-built platform pre-launch, identifying and remediating vulnerabilities across authentication, authorization, and data integrity; including a role-escalation flaw and a race condition in credit transaction handling.
- Owned the project end-to-end (**architecture, development, testing, deployment, and client communication**) with the platform now live at movehaus.id.

Software Laboratory Center, BINUS University

January 2025 - January 2026

Part time Lab Assistant

- Taught Python and SQL to **50+ students per semester**, ensuring comprehension of programming fundamentals.
- Designed and evaluated quizzes and projects in Python, C#, Laravel, and other languages, improving student engagement and coding accuracy.

Student Advisory and Support Center, BINUS University

February 2025 – June 2025

Tutor

- Conducted Data Structure sessions in C for **60+ students** across multiple sessions.
- Guided students in debugging, code optimization, and problem-solving techniques.

ORGANIZATIONAL EXPERIENCE

AIESEC in BINUS

February 2024 – February 2025

Team Leader of Outgoing Exchange Quality Assurance

- Led a **team of 3**, managing international partnerships with **10+ countries** to ensure smooth operations and compliance with global standards.
- Successfully coordinated and supported **11 Exchange Participants** during the summer, ensuring a smooth and compliant exchange experience.
- Ensured strict compliance with ECB (Entity Control Board) standards by streamlining the process of collecting, organizing, and verifying documents, resulting in a **flawless audit** with no flagged documents.
- Expedited onboarding by guiding participants through essential travel documentation (e.g., passports, visas).
- Implemented performance analysis and strategic improvements, increasing the efficiency and effectiveness of the Outgoing Global Exchange team.

COMPETITION

Elevaite Hackathon 2025 Indonesia

June 2025

- Placed **Top 10** among hundreds of participants
- Collaborated with team members to brainstorm an **IoT and AI** based solution to Indonesia's energy and waste problem

VOLUNTEER EXPERIENCE

AIIESEC in SGU (SeoGang University) February 2024 – February 2025

Exchange Participant

- Completed a **6-week** cultural exchange program in South Korea.
- Taught **60+ children** across two libraries, introducing Indonesian culture and improving their English language skills.
- Designed and implemented structured teaching plans to enhance learning outcomes

ADDITIONAL INFORMATION

- **Technical Skills:** C, Javascript, Python, SQL, PostgreSQL, React, MySQL, Java, HTML, CSS, GitHub, Figma, MS Office
- **Languages:** English (Fluent), Indonesian (Native)
